Cooperative Purchasing through SSC Satisfies Bid Requirements

Purchasing from SSC and MSC contracted vendors established through formal bids satisfies Minnesota competitive bidding requirements - no matter the amount of the purchase. The ability to do so is outlined in Minnesota Statutes 123A.2 and 471.345.

Minnesota Statute 123A.2 states that service cooperatives were created by a joint powers agreement and defines that their role is to provide programs and services that meet the needs of members. Cooperative Purchasing is one of those programs.

Minnesota Statute 471.345 Subdivision 15 defines how SSC members can purchase from the contracted vendors while staying in compliance with the competitive bidding requirements. This statute states:

“A municipality may contract for the purchase of supplies, materials, or equipment without regard to the competitive bidding requirements of this section if the purchase is through a national municipal association’s purchasing alliance or cooperative created by a joint powers agreement that purchases items from more than one source on the basis of competitive bids or competitive quotations.”

The combination of these two statutes gives SSC members the ability to purchase from contracted vendors without regard to the Minnesota competitive bidding requirements.
